## EDUCATION

---

- |   |                      |
|---|----------------------|
| <b>National Institute of Technology, Warangal</b><br><i>Master of Computer Applications (MCA)</i> | Aug 2019 – July 2022 |
| <b>INMANTEC College, Ghaziabad</b><br><i>Bachelor of Computer Applications (BCA)</i>              | Aug 2016 – July 2019 |

## EXPERIENCE

---

- |   |                     |
|---|---------------------|
| <b>Genpact Ltd.</b><br><i>Software Developer, Gurugram, Haryana</i> | Oct 2022 – Oct 2024 |
|---|---------------------|
- Worked on an Angular-based e-commerce webshop project, developing complex cart page features including client-side cart logic, Store API integration, and Stripe payment gateway implementation based on modular Angular components and services.
  - Independently developed frontend modules and database schema components for a Spring Boot library management system; implemented JWT authentication filter, security configuration, and backend REST APIs while collaborating with senior engineers on system design and security.
  - Contributed to DevOps initiatives alongside senior engineers, developing Python and YAML scripts for AWS EC2 automation, Lambda functions, and CI/CD pipeline deployments, reducing deployment time by 25%.
  - Designed and developed advanced templates using internal JavaScript/HTML/CSS tools, reducing business logic errors by 20%.
  - Wrote optimized SQL queries for efficient data management and reporting within relational databases, enhancing quality assurance processes.
  - Provided technical support to onshore testing teams for template troubleshooting, improving communication and issue resolution.

## PROJECTS

---

- **AI Resume Reviewer** — *React, Node.js, Express, OpenAI API, Puter, HTML, CSS, JavaScript, Git*
  - Developed a web app for instant AI-powered resume analysis and scoring.
  - Used Puter for efficient cloud resume file handling and processing.
  - Integrated OpenAI to generate feedback and actionable improvement tips.
  - Simple upload interface with recruiter-style summary and insights.Live
- **Inventory Management System** — *Java Spring Boot, Angular, MySQL, JWT, REST API, HTML-CSS, TypeScript*
  - Developed a full-stack inventory management system with secure user roles for admin and manager.
  - Implemented CRUD operations for products, suppliers, categories, and transactions.
  - Enabled real-time stock tracking, purchase/sale workflows, and status updates.
  - Integrated JWT authentication and analytics dashboards for seamless inventory control.
- **Blog App** — *Python, SQL, Django, Git*
  - Built a blog app with user sign-up, CRUD functionality, and admin dashboard.
  - Integrated tags/slugs and save-as-draft options for post management.GitHub

## TECHNICAL SKILLS

---

- **Languages:** Java, Python, JavaScript, C/C++, SQL (Postgres), React, Angular
- **Frameworks:** React, Django, Angular, Spring Boot, Hibernate
- **Developer Tools:** Git, Jira, VS Code, AWS, CI/CD, YAML
- **Libraries:** Pandas, NumPy, Matplotlib, Lombok
